ETFs – How are they used today by private wealth managers in Asia?

3.00pm

ETFs – How are they used today by private wealth managers in Asia?

- Why has the ETF market grown so far and so fast?
- Are Asia's private clients increasing their exposures via ETFs and why or why not?
- What is the wealth management community doing to promote the use of ETFs in private portfolios?
- Are ETFs useful for thematic exposures? Why and how?
- What are smart beta ETFs, and why should Asia's private clients add these types of exposures?
- Are Asia's investors interested only in equity ETFs or are they also buying fixed-income ETFs. Why or why not?
- Can Asia's investors boost the ESG credentials of their portfolios using ETFs? How?
- Are private investors buying into alternative asset ETFs to easily gain exposure to precious metals or currencies and other assets?
- How can ETFs fit within advisory and discretionary mandates?
- What ETF strategies and approaches are relevant for wealthy Asian clients today?
