Panel Discussion

Navigating the Future of Fixed Income in Private Client Portfolios

- What are the challenges and opportunities in fixed income derivative markets for private wealth clients?
- What role do geopolitical events play in shaping fixed income and credit markets, especially in Asia?
- How vital is this asset class going to be in the coming 12 months? Should it be a top priority?
- How are the latest trends influencing fixed income investment strategies for private wealth clients in the region?
- How are demographic changes, such as the growing wealth in Asia, influencing fixed income markets?
- What key skills and qualities are required from banks/firms to best support investors looking for support in navigating fixed income investments in 2024?
- Should private clients today be investing in higher quality asset classes, or should they go down the credit spectrum? Should they consider taking more risk to get a higher income in the current market environment?
- What does incorporating 'Fixed Income' look like in practice in 2024?
- What is the role/future of green and sustainable bonds in fixed income markets today?
