

Hubbis Opportunities from the low correlation in Vietnam equities and China bonds

15.00pm

Coming of age – opportunities from the low correlation in Vietnam equities and China bonds

There has been a sharp increase in foreign inflows into China bonds over the past 12 months, and index provider FTSE Russell will add China bonds to the FTSE World Government Bond Index (WGBI) over three years from the end of October. Premia Partners will discuss the benefits of investing in China bonds and the details of their two low cost China bond vehicles: 2817 Premia China Treasury & Policy Bank Bond Long Duration ETF and 3001 Premia China USD Property Bond ETF.

Premia Partners will also share their thoughts on the fast-growing Vietnam economy and equity markets, updates on emerging market index inclusion, details of their Vietnam ETF 2804 Premia MSCI Vietnam ETF and discuss the pros and cons of different Vietnam ETFs available in the offshore markets.
